

# Travel certificate for Emerade adrenaline auto-injector

Due to my risk of anaphylaxis (severe allergic reaction), I have been prescribed Emerade adrenaline auto-injector and should carry it at all times.

Patient name: \_\_\_\_\_

Physician's name and address: \_\_\_\_\_

Emerade is used for the **emergency treatment of serious allergic reactions** or anaphylaxis caused by peanuts or other foods, drugs, insect bites or stings and other allergens as well as exercise or unknown cause.

Emerade consists of a pre-filled syringe of **adrenaline (epinephrine)** in an automatic injection device (injection pen). This injects a single dose of adrenaline into muscle.

Adrenaline is a natural hormone released in response to stress. In an acute allergic reaction it improves blood pressure, heart function and breathing, and reduces swelling.
